## **Editorial Review**

### **Review**

I have just started looking at the lecturer resources on the online resource centre and I would like to say how good I think they are. The book is excellent and these resources augment it well. They will be really useful as they combine clarity with brevity - not a common characteristic of many support sites. Malcolm Young, University of Lincoln 'the book provides the clearest treatment of ontological and epistemological issues that I have seen in a student text.' Professor Tony Watson, Professor of Organizational and Managerial Behaviour, Nottingham Trent University 'While many texts in this field are brief and superficial, emphasizing authors' biases, Alan and Emma cover the range of qualitative and quantitative methods and epistemological debates.' Professor David A. Buchanan, Professor of Organizational Behaviour, Leicester Business School, De Montfort University 'This near-encyclopaedic treatment will prove invaluable to students of research methods and to those seeking practical help with a business research project. The volume is packed with useful examples and it offers a balanced consideration of the array of available methods.' John Storey, Professor of Management, The Open University Business School
