**Advanced Motion Control and Sensing for Intelligent Vehicles** By Li Li, Fei-Yue Wang

This book provides the latest information in intelligent vehicle control and intelligent transportation. Detailed discussions of vehicle dynamics and ground-vehicle interactions are provided for the modeling, simulation and control of vehicles. It includes an extensive review of past and current research achievements in the intelligent vehicle motion control and sensory field, and the book provides a careful assessment of future developments.

### Editorial Review

Review

From the reviews:

"The state of the art summary (9 chapters, 1371 references, 224 figures) of research activities in ground vehicle motion control and sensing is provided, and a multi-disciplinary perspective in this field is offered. ... The book is intended for graduate and postgraduate students, engineers and researchers who are interested in the past and current research on intelligent ground vehicles." (Ingmar Randvee, Zentralblatt MATH, Vol. 1113 (15), 2007)

From the Back Cover

**Advanced Motion Control and Sensing for Intelligent Vehicles** provides the latest information in intelligent vehicle control, sensing, and intelligent transportation. It addresses the growing need for safe, comfortable, time and energy-efficient modes of transportation with emphasis on the latest key findings, current trends, and likely future developments in this rapidly expanding field.

Highlights:

- Discusses individual vehicle dynamics, sensory and multiple ground-vehicle interactions
- Includes systematic review of past and current research achievements
- Presents case studies in cutting-edge directions such as vehicle steering motion, vehicle vision systems, cooperative driving, intersection safety, and tire pressure monitoring
- Assesses the likely future developments of this field

This book is useful for both practicing engineers and researchers in the automotive industry.

### Users Review

From reader reviews:

**Brian Wilson:**

Advanced Motion Control and Sensing for Intelligent Vehicles can be one of your starter books that are good idea. All of us recommend that straight away because this publication has good vocabulary that could increase your knowledge in words, easy to understand, bit entertaining but nevertheless delivering the information. The author giving his/her effort to place every word into enjoyment arrangement in writing Advanced Motion Control and Sensing for Intelligent Vehicles but doesn't forget the main position, giving

the reader the hottest along with based confirm resource facts that maybe you can be one of it. This great information can certainly drawn you into fresh stage of crucial pondering.

**Marco Roy:**

Many people spending their period by playing outside along with friends, fun activity using family or just watching TV the entire day. You can have new activity to enjoy your whole day by studying a book. Ugh, ya think reading a book can definitely hard because you have to take the book everywhere? It all right you can have the e-book, getting everywhere you want in your Smart phone. Like Advanced Motion Control and Sensing for Intelligent Vehicles which is getting the e-book version. So , why not try out this book? Let's observe.

**Phillip Darrah:**

As a student exactly feel bored for you to reading. If their teacher inquired them to go to the library in order to make summary for some reserve, they are complained. Just little students that has reading's internal or real their leisure activity. They just do what the professor want, like asked to the library. They go to generally there but nothing reading seriously. Any students feel that examining is not important, boring in addition to can't see colorful images on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this age, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. So , this Advanced Motion Control and Sensing for Intelligent Vehicles can make you feel more interested to read.

**Thelma Davis:**

Reading a book make you to get more knowledge from it. You can take knowledge and information from your book. Book is published or printed or descriptive from each source that filled update of news. On this modern era like right now, many ways to get information are available for you actually. From media social similar to newspaper, magazines, science publication, encyclopedia, reference book, book and comic. You can add your understanding by that book. Ready to spend your spare time to open your book? Or just trying to find the Advanced Motion Control and Sensing for Intelligent Vehicles when you necessary it?
