Multidetector-Row CT of the Thorax (Medical Radiology) From Springer

Since the first edition of this book was published in 2004, computed tomography has seen groundbreaking technical innovations that have transformed the field of thoracic imaging and opened novel possibilities for the detection of thoracic pathologies. This book highlights cutting-edge thoracic applications of CT imaging in the context of these technical innovations and discusses the latest opportunities, with critical appraisal of challenges and controversies. All topics are covered by renowned international experts. Chapters from the original edition have been thoroughly updated to reflect the state of the art in technology and scientific evidence, and new contributions included on recent developments such as dual-energy CT and CT imaging in patients with acute chest pain. The book is abundantly illustrated with high-quality images and illustrations.

About the Author

Joe Schoepf is a Professor with appointments in Radiology, Medicine, and Pediatrics at the Medical University of South Carolina (MUSC) in Charleston, SC. At MUSC Dr. Schoepf serves as director of the Division of Cardiovascular Imaging, of CT Research and Development, and as Cardiovascular Imaging Director of the University Designated Center for Biomedical Imaging.

Dr. Schoepf, a native of Austria, graduated from the medical school of Ludwig Maximilians University in Munich, Germany, in 1996. After his residency in Diagnostic Radiology at Klinikum Grosshadern, Munich, Germany, he assumed a position at Brigham and Women's Hospital, Harvard Medical School, in Boston, MA, which he held from 2001-2004. His main clinical and scientific interest is non-invasive cardiovascular and thoracic imaging, especially the use of advanced CT and MRI techniques for diagnosing disorders of the heart and lung.

Felix G. Meinel is a clinical fellow and researcher in the Department of Clinical Radiology at Ludwig-Maximilians-University Hospital in Munich, Germany. Dr. Meinel received his medical degree from Ludwig-Maximilians-University in Munich and trained in Radiology at the same institution. He was a visiting instructor in the Division of Cardiovascular Imaging at the Medical University of South Carolina (Charleston, SC) from 2013 to 2014 before returning to Munich to complete his clinical training. His main research interests include thoracic and cardiovascular CT imaging – both the advancement of CT technique and how CT imaging can be used to gain novel insights into disease.

Users Review

From reader reviews:

Liliana Stevens:

To help you to see the represented of the world with this book.

John Hagen:

Reading a publication tends to be new life style in this era globalization. With reading through you can get a lot of information that may give you benefit in your life. With book everyone in this world can share their idea. Publications can also inspire a lot of people. Lots of author can inspire their own reader with their story or their experience. Not only situation that share in the ebooks. But also they write about the information about something that you need case in point. How to get the good score toefl, or how to teach children, there are many kinds of book that exist now. The authors on earth always try to improve their proficiency in writing, they also doing some research before they write on their book. One of them is this Multidetector-Row CT of the Thorax (Medical Radiology).

Luis Poole:

Do you one of the book lovers? If yes, do you ever feeling doubt when you are in the book store? Try and pick one book that you find out the inside because don't assess book by its protect may doesn't work here is difficult job because you are afraid that the inside maybe not while fantastic as in the outside appearance likes. Maybe you answer might be Multidetector-Row CT of the Thorax (Medical Radiology) why because the great cover that make you consider about the content will not disappoint an individual. The inside or content is actually fantastic as the outside or cover. Your reading 6th sense will directly make suggestions to pick up this book.

Timothy Quintero:

As a college student exactly feel bored to reading. If their teacher requested them to go to the library in order to make summary for some guide, they are complained. Just minor students that has reading's heart and soul or real their pastime. They just do what the trainer want, like asked to go to the library. They go to presently there but nothing reading significantly. Any students feel that looking at is not important, boring along with can't see colorful pics on there. Yeah, it is to become complicated. Book is very important for yourself. As we know that on this age, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore this Multidetector-Row CT of the Thorax (Medical Radiology) can make you really feel more interested to read.
