**The Cosmic Perspective (7th Edition)** By Jeffrey O. Bennett, Megan O. Donahue, Nicholas Schneider, Mark Voit

NOTE: This ISBN is a Standalone Book. The Item does not include Access code

Building on a long tradition of effective pedagogy and comprehensive coverage, *The Cosmic Perspective, Seventh Edition* provides a thoroughly engaging and up-to-date introduction to astronomy for non-science majors. The text provides a wealth of features that enhance skill-building, including new group work exercises that help you retain concepts longer and build communication skills for the future. The Seventh Edition has also been fully updated to include the latest astronomical observations, results from recent space missions, research, and theoretical developments that inform our understanding of the early universe.

Two volumes of this text are also available:

- *The Cosmic Perspective: The Solar System, Seventh Edition* (includes Chapters 1—13, 24)
- *The Cosmic Perspective: Stars, Galaxies, and Cosmology, Seventh Edition* (includes Chapters 1—6, S2—S4, 14—24)

## **Editorial Review**

About the Author

### **Jeffrey Bennett**

Jeffrey Bennett holds a B.A. (1981) in biophysics from the University of California, San Diego, and an M.S. and Ph.D. (1987) in astrophysics from the University of Colorado, Boulder. He has taught at every level from preschool through graduate school, including more than 50 college classes in astronomy, physics, mathematics, and education. He served 2 years as a visiting senior scientist at NASA headquarters, where he created NASA's "IDEAS" program, started a program to fly teachers aboard NASA's airborne observatories (including SOFIA), and worked on numerous educational programs for the Hubble Space Telescope and other space science missions. He also proposed the idea for and helped develop both the Colorado Scale Model Solar System on the CU-Boulder campus and the Voyage Scale Model Solar System on the National Mall in Washington, D.C. In addition to this astronomy textbook, he is also lead author of college-level textbooks in astrobiology, mathematics, and statistics (all from Pearson); of critically acclaimed two books for the general public including , *On the Cosmic Horizon* (Pearson Addison-Wesley, 2001) and *Beyond UFOs* (Princeton University Press, 2008/2011) and *Math for Life* (Roberts & Co, 2012); and an of the award-winning series of children's books that includes *Max Goes to the Moon*, *Max Goes to Mars*, *Max Goes to Jupiter*, and *Max's Ice Age Adventure* *The Wizard Who Saved the World*. When not working, he enjoys participating in masters swimming and in the daily adventures of life with his wife, Lisa; his children, Grant and Brooke; and his dog, Cosmo. His personal Web site is [www.jeffreybennett.com](http://www.jeffreybennett.com).

### **Megan Donahue**

Megan Donahue is a professor in the Department of Physics and Astronomy at Michigan State University. Her current research is mainly about using X-ray, UV, infrared, and visible light to study clusters of galaxies: their contents—dark matter, hot gas, galaxies, active galactic nuclei—and what they reveal about the contents of the universe and how galaxies form and evolve. She grew up on a farm in Nebraska and received an S.B. in physics from MIT, where she began her research career as an X-ray astronomer. She has a Ph.D. in astrophysics from the University of Colorado. Her Ph.D. thesis on theory and optical observations of intergalactic and intracluster gas won the 1993 Trumpler Award from the Astronomical Society for the Pacific for an outstanding astrophysics doctoral dissertation in North America. She continued postdoctoral research as a Carnegie Fellow at Carnegie Observatories in Pasadena, California, and later as an STScI Institute Fellow at Space Telescope. Megan was a staff astronomer at the Space Telescope Science Institute until 2003, when she joined the MSU faculty. Megan is married to Mark Voit, and they collaborate on many projects, including this textbook and the raising of their children, Michaela, Sebastian, and Angela. Between the births of Sebastian and Angela, Megan qualified for and ran the Boston Marathon. These days, Megan runs trails, orienteers, and plays piano and bass guitar whenever her children allow it.

### **Nicholas Schneider**

Nicholas Schneider is an associate professor in the Department of Astrophysical and Planetary Sciences at the University of Colorado and a researcher in the Laboratory for Atmospheric and Space Physics. He received his B.A. in physics and astronomy from Dartmouth College in 1979 and his Ph.D. in planetary science from the University of Arizona in 1988. In 1991, he received the National Science Foundation's Presidential Young Investigator Award. His research interests include planetary atmospheres and planetary astronomy, with a focus on the odd case of Jupiter's moon Io. He enjoys teaching at all levels and is active in efforts to improve undergraduate astronomy education. Off the job, he enjoys exploring the outdoors with his

family and figuring out how things work.

### **Mark Voit**

Mark Voit is a professor in the Department of Physics and Astronomy at Michigan State University. He earned his A.B. in astrophysical sciences at Princeton University and his Ph.D. in astrophysics at the University of Colorado in 1990. He continued his studies at the California Institute of Technology, where he was a research fellow in theoretical astrophysics, and then moved on to Johns Hopkins University as a Hubble Fellow. Before going to Michigan State, Mark worked in the Office of Public Outreach at the Space Telescope, where he developed museum exhibitions about the Hubble Space Telescope and helped design NASA's award-winning HubbleSite. His research interests range from interstellar processes in our own galaxy to the clustering of galaxies in the early universe. He is married to coauthor Megan Donahue, and cooks terrific meals for her and their three children. Mark likes getting outdoors whenever possible and particularly enjoys running, mountain biking, canoeing, orienteering, and adventure racing. He is also author of the popular book *Hubble Space Telescope: New Views of the Universe*.

### **Users Review**

#### **From reader reviews:**

#### **Harold Felix:**

Do you among people who can't read satisfying if the sentence chained in the straightway, hold on guys this particular aren't like that. This *The Cosmic Perspective (7th Edition)* book is readable by means of you who hate the perfect word style. You will find the information here are arrange for enjoyable reading through experience without leaving actually decrease the knowledge that want to offer to you. The writer regarding *The Cosmic Perspective (7th Edition)* content conveys prospect easily to understand by many individuals. The printed and e-book are not different in the information but it just different available as it. So , do you even now thinking *The Cosmic Perspective (7th Edition)* is not loveable to be your top listing reading book?

#### **Betty Dansby:**

Playing with family inside a park, coming to see the ocean world or hanging out with buddies is thing that usually you could have done when you have spare time, then why you don't try issue that really opposite from that. A single activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of information. Even you love *The Cosmic Perspective (7th Edition)*, you could enjoy both. It is very good combination right, you still would like to miss it? What kind of hang type is it? Oh occur its mind hangout men. What? Still don't get it, oh come on its referred to as reading friends.

#### **Shaun Sae:**

*The Cosmic Perspective (7th Edition)* can be one of your beginner books that are good idea. We all recommend that straight away because this publication has good vocabulary which could increase your knowledge in terminology, easy to understand, bit entertaining but nevertheless delivering the information. The article writer giving his/her effort to place every word into pleasure arrangement in writing *The Cosmic Perspective (7th Edition)* nevertheless doesn't forget the main place, giving the reader the hottest in addition to based confirm resource details that maybe you can be among it. This great information could drawn you

into fresh stage of crucial contemplating.

**Christopher Rangel:**

This The Cosmic Perspective (7th Edition) is brand new way for you who has intense curiosity to look for some information as it relief your hunger of knowledge. Getting deeper you into it getting knowledge more you know otherwise you who still having tiny amount of digest in reading this The Cosmic Perspective (7th Edition) can be the light food in your case because the information inside this specific book is easy to get through anyone. These books build itself in the form which is reachable by anyone, that's why I mean in the e-book web form. People who think that in publication form make them feel sleepy even dizzy this e-book is the answer. So there is absolutely no in reading a publication especially this one. You can find what you are looking for. It should be here for you actually. So , don't miss the idea! Just read this e-book style for your better life along with knowledge.
