

The EHRA Book of Interventional Electrophysiology: Case-based learning with multiple choice questions (The European Society of Cardiology)

From Oxford University Press

The EHRA Book of Interventional Electrophysiology: Case-based learning with multiple choice questions (The European Society of Cardiology) From Oxford University Press

The EHRA Book of Interventional Electrophysiology is the second official textbook of European Heart Rhythm Association (EHRA). Using clinical cases to encourage practical learning, this book assists electrophysiologists and device specialists in tackling both common and unusual situations that they may encounter during daily practice.

Richly illustrated, and covering electrophysiological procedures for supra-ventricular and ventricular arrhythmias, the book enables specialists to deepen their understanding of complex concepts and techniques. Tracings, covering supra-ventricular and ventricular arrhythmias, are presented with multiple-choice questions to allow readers to hone their skills for interpreting challenging cases and to prepare for the EHRA certification exam in electrophysiology. Cases include Orthodromic AVRT, PV Isolation, VT ablation, and Atypical left atrial flutter to name a few.

The EHRA Book of Interventional Electrophysiology is a wide-ranging, practical case-book, written by leading experts in the field and edited by members of the EHRA education committee: an essential companion for electrophysiologists and trainees alike.

Editorial Review

Review

This book closes a significant gap in the portfolio of EHRA educational products as it presents excellent clinical cases from interventional electrophysiology in a very practical fashion. All major fields of interventional electrophysiology are covered with interesting ECGs and EP tracings and beautifully illustrated clinical cases. In addition, the feature of self-assessment with multiple choice questions and the excellent comments and explanations complete the value of this educational tool... This book is a must read for everyone interested in clinical electrophysiology and will certainly contribute to improve the knowledge about heart rhythm disturbances and thereby the quality of care for the benefit of our patients with cardiac arrhythmias. * Gerhard Hindricks, EHRA President * The EHRA Book of Interventional Electrophysiology is a very enjoyable way to update yourself on all major types of recordings used in the EP laboratory. The cases are brief and to the point with very clear electrograms. They cover important electrogram observations, both common and uncommon. I recommend the text, and suspect that you will not want to put it down. * Warren M. (Sonny) Jackman, Heart Rhythm Institute, University of Oklahoma * The basics of clinical cardiac electrophysiology set out with beautiful traces and clear concise explanations - an excellent and efficient learning resource. * Prof. Dr. John Camm, Professor of Clinical Cardiology, St. Georges University of London *

About the Author

Hein Heidbuchel, *Heart Center Hasselt and Hasselt University, Belgium*, Haran Burri, *Cardiology Service University Hospital of Geneva, Switzerland*, Mattias Duytschaever, *Saint-Jan Hospital Bruges, Department of Cardiology, Bruges, Belgium*

Professor Heidbuchel graduated as MD from the University of Leuven, Belgium, in 1986. He went on to undertake a PhD in Physiology (1992), gained specialist degrees in Internal Medicine (1993) and Cardiology (1995), and a special accreditation in Hospital Administration and Management (2005). He trained as a Research Fellow of the NIH at the University of Oklahoma in 1993 and 1994, supported by a Fulbright-Hays grant-in-aid, and was a Fundamental Clinical Investigator of the Fund for Scientific Research Flanders from 1996 to 2006.

Professor Heidbuchel worked at the University Hospitals and Faculty of Medicine of the University of Leuven, Belgium, between 1994 and 2014. In 2014 he moved to the Heart Center of the Jessa Hospital and Hasselt University, Belgium.

Professor Burri is an electrophysiologist involved in ablation and device procedures. He has chaired the EHRA education committee and is also a member of the ESC education committee. He is a Professor at the Medical Faculty of the University of Geneva.

Professor Duytschaever became professor in electrophysiology at the University of Ghent in 2003. Since 2006, he has been conducting diagnostic and interventional electrophysiology at the department of cardiology at St Jan Hospital Bruges. Professor Duytschaever is an active clinical researcher at both institutes and has published widely on the pathogenesis and treatment of arrhythmias. He is a member of the

EHRA education committee.

Users Review

From reader reviews:

Paula Mendoza:

Do you have favorite book? In case you have, what is your favorite's book? E-book is very important thing for us to understand everything in the world. Each reserve has different aim or even goal; it means that e-book has different type. Some people truly feel enjoy to spend their time and energy to read a book. They are reading whatever they get because their hobby is definitely reading a book. Why not the person who don't like reading a book? Sometime, man or woman feel need book after they found difficult problem as well as exercise. Well, probably you will need this The EHRA Book of Interventional Electrophysiology: Case-based learning with multiple choice questions (The European Society of Cardiology).

John Mallery:

Book will be written, printed, or highlighted for everything. You can realize everything you want by a e-book. Book has a different type. We all know that that book is important point to bring us around the world. Adjacent to that you can your reading proficiency was fluently. A book The EHRA Book of Interventional Electrophysiology: Case-based learning with multiple choice questions (The European Society of Cardiology) will make you to end up being smarter. You can feel more confidence if you can know about every thing. But some of you think which open or reading any book make you bored. It is not necessarily make you fun. Why they might be thought like that? Have you trying to find best book or appropriate book with you?

Katherine Holt:

Hey guys, do you would like to finds a new book to read? May be the book with the name The EHRA Book of Interventional Electrophysiology: Case-based learning with multiple choice questions (The European Society of Cardiology) suitable to you? The actual book was written by popular writer in this era. Typically the book untitled The EHRA Book of Interventional Electrophysiology: Case-based learning with multiple choice questions (The European Society of Cardiology)is a single of several books in which everyone read now. That book was inspired many people in the world. When you read this reserve you will enter the new dimensions that you ever know prior to. The author explained their strategy in the simple way, consequently all of people can easily to comprehend the core of this guide. This book will give you a great deal of information about this world now. To help you to see the represented of the world with this book.

Betty Bass:

That guide can make you to feel relax. This specific book The EHRA Book of Interventional Electrophysiology: Case-based learning with multiple choice questions (The European Society of Cardiology) was colourful and of course has pictures on the website. As we know that book The EHRA Book of Interventional Electrophysiology: Case-based learning with multiple choice questions (The

European Society of Cardiology) has many kinds or variety. Start from kids until adolescents. For example Naruto or Private eye Conan you can read and believe that you are the character on there. Therefore not at all of book tend to be make you bored, any it can make you feel happy, fun and rest. Try to choose the best book for yourself and try to like reading which.
