Digital Systems Design and Prototyping: Using Field Programmable Logic and Hardware Description Languages By Zoran Salcic, Asim Smailagic

Digital Systems Design and Prototyping: Using Field Programmable Logic and Hardware Description Languages, Second Edition covers the subject of digital systems design using two important technologies: Field Programmable Logic Devices (FPLDs) and Hardware Description Languages (HDLs). These two technologies are combined to aid in the design, prototyping, and implementation of a whole range of digital systems from very simple ones replacing traditional glue logic to very complex ones customized as the applications require. Three HDLs are presented: VHDL and Verilog, the widely used standard languages, and the proprietary Altera HDL (AHDL). The chapters on these languages serve as tutorials and comparisons are made that show the strengths and weaknesses of each language.

A large number of examples are used in the description of each language providing insight for the design and implementation of FPLDs.

With the addition of the Altera UP-1 prototyping board, all examples can be tested and verified in a real FPLD.

Digital Systems Design and Prototyping: Using Field Programmable Logic and Hardware Description Languages, Second Edition is designed as an advanced level textbook as well as a reference for the professional engineer.

Editorial Review

Users Review

From reader reviews:

Johnny Mosier:

In other case, little folks like to read book Digital Systems Design and Prototyping: Using Field Programmable Logic and Hardware Description Languages. You can choose the best book if you love reading a book. Given that we know about how is important a book Digital Systems Design and Prototyping: Using Field Programmable Logic and Hardware Description Languages. You can add information and of course you can around the world with a book. Absolutely right, simply because from book you can learn everything! From your country until finally foreign or abroad you will find yourself known. About simple matter until wonderful thing it is possible to know that. In this era, you can open a book or perhaps searching by internet product. It is called e-book. You can use it when you feel uninterested to go to the library. Let's study.

Justin Perry:

Do you one of the book lovers? If so, do you ever feeling doubt while you are in the book store? Attempt to pick one book that you find out the inside because don't judge book by its cover may doesn't work at this point is difficult job because you are scared that the inside maybe not since fantastic as in the outside appear likes. Maybe you answer can be Digital Systems Design and Prototyping: Using Field Programmable Logic and Hardware Description Languages why because the excellent cover that make you consider in regards to the content will not disappoint you. The inside or content is fantastic as the outside or even cover. Your reading 6th sense will directly make suggestions to pick up this book.

Gerri Pettit:

Don't be worry when you are afraid that this book will certainly filled the space in your house, you may have it in e-book approach, more simple and reachable. This Digital Systems Design and Prototyping: Using Field Programmable Logic and Hardware Description Languages can give you a lot of buddies because by you looking at this one book you have factor that they don't and make you actually more like an interesting person. This book can be one of one step for you to get success. This reserve offer you information that perhaps your friend doesn't realize, by knowing more than some other make you to be great persons. So , why hesitate? We need to have Digital Systems Design and Prototyping: Using Field Programmable Logic and Hardware Description Languages.

Paul Kennedy:

A lot of people said that they feel bored stiff when they reading a e-book. They are directly felt it when they get a half regions of the book. You can choose the actual book Digital Systems Design and Prototyping: Using Field Programmable Logic and Hardware Description Languages to make your own personal reading is interesting. Your personal skill of reading ability is developing when you including reading. Try to choose straightforward book to make you enjoy to see it and mingle the opinion about book and studying especially. It is to be initial opinion for you to like to start a book and go through it. Beside that the reserve Digital Systems Design and Prototyping: Using Field Programmable Logic and Hardware Description Languages can to be your new friend when you're feel alone and confuse using what must you're doing of their time.
