

Introduction to Quantum Information Science (Oxford Graduate Texts)

By Vlatko Vedral

Introduction to Quantum Information Science (Oxford Graduate Texts) By Vlatko Vedral

This book offers a concise and up-to-date introduction to the popular field of quantum information. It has originated in a series of invited lecture courses at various universities in different countries. This is reflected in its informal style of exposition and presentation of key results in the subject. In addition to treating quantum communication, entanglement and algorithms in great depth, this book also addresses a number of interesting miscellaneous topics, such as Maxwell's demon, Landauer's erasure, the Bekenstein bound and Caratheodory's treatment of the Second law of thermodyanmics. All mathematical derivations are based on clear physical pictures which make even the most involved results--such as the Holevo bound-- look comprehensible and transparent. The book is ideal as a first introduction to the subject, but may also appeal to the specialist due to its unique presentation.

Editorial Review

Review

"The book is a good, techincal read, with many pithy or whimsical footnotes sprinkled throughout." --Jonathan R. Friedman, *Physics Today*

About the Author

Vlatko Vedral Centenary Professor of Quantum Information School of Physics and Astronomy University of Leeds Leeds LS2 9JT Vlatko Vedral studied his undergraduate degree and PhD at Imperial College (1992-1998). After graduating from his PhD in 1998, he took up a junior research fellowship at Merton College in Oxford where he stayed for two years (1998-2000). He returned to Imperial College in 2000 as a governors' lecturer and was promoted to reader in 2003. In October 2004 he moved to Leeds University as the centenary professor of Quantum Information Science. He has taught at many different universities and held visiting professorships at Oxford, Vienna, Singapore and Perimeter Institute in Canada.

Vlatko Vedral is an active researcher in quantum information and quantum mechanics, having published over 100 papers in these fields. He enjoys explaining science to the media and has been interviewed on a number of occasions regarding his work and the state of the field. He has contributed to several introductory books on quantum computing as well as written a textbook on Quantum Optics.

Users Review

From reader reviews:

Elvira Eberhardt:

Introduction to Quantum Information Science (Oxford Graduate Texts) can be one of your basic books that are good idea. Most of us recommend that straight away because this reserve has good vocabulary that could increase your knowledge in vocabulary, easy to understand, bit entertaining but still delivering the information. The article writer giving his/her effort that will put every word into joy arrangement in writing Introduction to Quantum Information Science (Oxford Graduate Texts) however doesn't forget the main level, giving the reader the hottest and based confirm resource info that maybe you can be considered one of it. This great information could drawn you into brand-new stage of crucial imagining.

Jason Faria:

In this age globalization it is important to someone to find information. The information will make someone to understand the condition of the world. The condition of the world makes the information quicker to share. You can find a lot of sources to get information example: internet, newspapers, book, and soon. You can observe that now, a lot of publisher in which print many kinds of book. The book that recommended to you personally is Introduction to Quantum Information Science (Oxford Graduate Texts) this book consist a lot of the information in the condition of this world now. This book was represented how does the world has grown up. The language styles that writer use for explain it is easy to understand. Typically the writer made some investigation when he makes this book. This is why this book ideal all of you.

Kent Brown:

As we know that book is vital thing to add our knowledge for everything. By a e-book we can know everything we really wish for. A book is a group of written, printed, illustrated or maybe blank sheet. Every year had been exactly added. This e-book Introduction to Quantum Information Science (Oxford Graduate Texts) was filled regarding science. Spend your free time to add your knowledge about your science competence. Some people has different feel when they reading a new book. If you know how big selling point of a book, you can truly feel enjoy to read a reserve. In the modern era like right now, many ways to get book you wanted.

Rafael Perez:

Publication is one of source of expertise. We can add our knowledge from it. Not only for students but native or citizen require book to know the upgrade information of year to year. As we know those books have many advantages. Beside we add our knowledge, could also bring us to around the world. With the book Introduction to Quantum Information Science (Oxford Graduate Texts) we can acquire more advantage. Don't you to be creative people? To become creative person must love to read a book. Just choose the best book that suitable with your aim. Don't be doubt to change your life at this time book Introduction to Quantum Information Science (Oxford Graduate Texts). You can more inviting than now.
