Editorial Review

Review

"... This is the story of a life in science, perceptively and engagingly told; it is well worthy of a place in every astronomer's library." -- *The Observatory*

"...He gives an enthralling account of 90 nights of mammoth effort in the autumn of 1950 that led to the discovery of the radio emission from the spiral nebula in Andromeda." -- *New Scientist*

"BOFFIN is the highly entertaining story of a man who has lived and breathed science, its excitement, interest and difficulty." -- *Europe and Astronomy*

"Boffin is a gripping, amusing and informative record of the life of a great 'middleman' capable of relating the world of science to the practicalities of the everyday world. But it is more. It is a commentary on the way society is (mis)managed and the way science is (mis)represented. The author demonstrates the rare gift of entertaining while he educates. You will enjoy it!" -- *Physics Education*

Users Review

From reader reviews:

Jill Barks:

Here thing why this particular Boffin: A Personal Story of the Early Days of Radar, Radio Astronomy and Quantum Optics are different and reliable to be yours. First of all reading a book is good nevertheless it depends in the content than it which is the content is as tasty as food or not.
