Bang!: The Complete History of the Universe By Brian May, CBE, DSc, FRAS, Sir Patrick Moore, Chris Lintott

Rock legend and experienced amateur astronomer Brian May joins the legendary expert Sir Patrick Moore to tell the story of the Universe from the moment time and space came into existence at the Big Bang, through to the infinite future and the ultimate fate that awaits us. Many of the pictures of the Universe obtained by instruments such as the Hubble Space Telescope or the Very Large Telescope in Chile are beautiful enough to be considered works of art in their own right. This book presents them in context, and uses extraordinary new artworks to explain the mind-blowing theories from the cutting edge of astronomy in a way that everyone can understand.

Editorial Review

Review

"Highly recommended for community library astrology collections and for anyone who wants a unbiased look at the universe itself."

(Midwest Book Review)

"The story is told in clear, straightforward terms, in the strict order in which the events happened, and uses no mathematics."

(Steve Goddard History Wire - Where the Past Comes Alive)

"There's at least one rock star who knows a thing or two about *real* stars."

(Jeff Foust Space Review)

"The scope of the book is ambitious; its hard to cram in antimatter and inflation in one chapter and then skip to planetary science and biology in the next. Still, the authors do a wonderful job tackling a broad array of cosmic subjects. This is just the kind of book that would have fired up my imagination as a kid!... In the end, *Bang!* is an excellent illustrated compendium for what are perhaps weightier and less accessible tomes."

(AstroGuyz.com)

"Stunningly illustrated... breathtaking views of galaxies."

(Journal for the History of Astronomy)

"It basically takes the reader on a tour of the entire universe, and tells you everything you want to know... It's beautifully described, accurate and they feature fantastic photography. If you like astronomy and those Hubble pictures on the Internet, don't know much but would love to learn more, this would be a great book for you."

(Philip Plait FiveBooks)

About the Author

Though best known to the world as the lead guitarist for the supergroup Queen, Brian May also studied for a PhD in astrophysics. Patrick Moore is the world's best-loved astronomer, author of more than 100 books, and presenter of the world's longest running TV programme, BBC's "The Sky at Night". Chris Lintott is best-known as the co-presenter, with Patrick, of "The Sky at Night". He took his first degree in Physics at Cambridge, then his PhD in Astrophysics at University College London, and is now doing further research at Oxford.

Users Review

From reader reviews:

Ruth Ward:

Do you have favorite book? When you have, what is your favorite's book? E-book is very important thing for us to understand everything in the world.
