Mainstreaming Building Energy Efficiency Codes in Developing Countries (World Bank Working Papers) By Feng Liu, Anke S. Meyer, John F. Hogan

Urbanization and growing wealth in developing countries portend a large increase of demand for modern energy services in residential, commercial and public-service buildings in the coming decades. Pursuing energy efficiency in buildings is vital to energy security in developing countries and is identified by the Intergovernment Panel on Climate Change as having the greatest potential for cost-effective reduction of CO₂ emissions by 2030 among all energy-consuming sectors. Building energy efficiency codes (BEECs), along with energy efficiency standards for major appliances and equipment, are broadly recognized as a necessary government intervention to overcome persistent market barriers to capturing the economic potential of energy efficiency gains in the residential, commercial and public-service sectors. Implementation of BEECs help prevent costly energy wastes over the lifecycles of buildings in space heating, air conditioning, lighting, and other energy service requirements. Nonetheless, achieving the full potential of energy savings afforded by more energy-efficient buildings requires holding people who live or work in buildings accountable for the cost of energy services. Compliance enforcement has been the biggest challenge to implementing BEECs. This report summarizes the findings of an extensive literature survey of the experiences of implementing BEECs in developed countries, as well as those from case studies of China, Egypt, India, and Mexico. It also serves as a primer on the basic features and contents of BEECs and the commonly adopted compliance and enforcement approaches. This report highlights the key challenges to improving compliance enforcement in developing countries, including government commitment to energy efficiency, the effectiveness of government oversight of the construction sector, the compliance capacity of building supply chain, and financing constraints. The report notes that the process of transforming a country's building supply chain toward delivering increasingly more energy-efficient buildings takes time and requires persistent government intervention through uniformly enforced and regularly updated BEECs. The report recommends increased international support in strengthening the enforcement infrastructure for BEECs in middle-income developing countries. For low- and lower-middle-income countries, there is an urgent need to assist in improving the effectiveness of government oversight

system for building construction, laying the foundation for the system to also cover BEECs.

Editorial Review

Users Review

From reader reviews:

Adrian Woodson:

The book Mainstreaming Building Energy Efficiency Codes in Developing Countries (World Bank Working Papers) give you a sense of feeling enjoy for your spare time. You can utilize to make your capable considerably more increase. Book can for being your best friend when you getting tension or having big problem using your subject. If you can make looking at a book Mainstreaming Building Energy Efficiency Codes in Developing Countries (World Bank Working Papers) for being your habit, you can get considerably more advantages, like add your current capable, increase your knowledge about some or all subjects. You could know everything if you like available and read a e-book Mainstreaming Building Energy Efficiency Codes in Developing Countries (World Bank Working Papers). Kinds of book are several. It means that, science e-book or encyclopedia or other people. So , how do you think about this e-book?

Leroy Mallett:

Now a day folks who Living in the era just where everything reachable by interact with the internet and the resources included can be true or not demand people to be aware of each information they get. How people have to be smart in receiving any information nowadays? Of course the answer then is reading a book. Examining a book can help folks out of this uncertainty Information particularly this Mainstreaming Building Energy Efficiency Codes in Developing Countries (World Bank Working Papers) book since this book offers you rich facts and knowledge. Of course the knowledge in this book hundred per-cent guarantees there is no doubt in it you may already know.

Delores Villarreal:

A lot of people always spent all their free time to vacation or go to the outside with them family members or their friend. Did you know? Many a lot of people spent these people free time just watching TV, or maybe playing video games all day long. If you wish to try to find a new activity that's look different you can read the book. It is really fun to suit your needs. If you enjoy the book that you simply read you can spent all day long to reading a book. The book Mainstreaming Building Energy Efficiency Codes in Developing Countries (World Bank Working Papers) it is extremely good to read. There are a lot of people that recommended this book. These people were enjoying reading this book. In case you did not have enough space to bring this book you can buy the actual e-book. You can m0ore quickly to read this book from the smart phone. The price is not very costly but this book possesses high quality.

Maria Blanco:

As a scholar exactly feel bored to help reading. If their teacher requested them to go to the library or make summary for some e-book, they are complained. Just very little students that has reading's internal or real their pastime. They just do what the trainer want, like asked to go to the library. They go to at this time there but nothing reading really. Any students feel that looking at is not important, boring and can't see colorful photographs on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. So , this Mainstreaming Building Energy Efficiency Codes in Developing Countries (World Bank Working Papers) can make you experience more interested to read.
