Subliminal: The Revolution of the New Unconscious and What it Teaches Us About Ourselves From Penguin Books Ltd

Leonard Mlodinow, the best-selling author of "The Drunkard's Walk" and coauthor of "The Grand Design" (with Stephen Hawking) and "War of the Worldviews" (with Deepak Chopra) here examines how the unconscious mind shapes our experience of the world, and how, for instance, we often misperceive everything from our relationships with family, friends and business associates, the reasons for our investment decisions, to our own past. Your preference in politicians, the amount of tip you give the waiter - all our judgments and perceptions - reflect the workings of our mind on two levels, the conscious, of which we are aware, and the unconscious, which is hidden from us. The latter has long been the subject of speculation, but over the past two decades scientific researchers have developed remarkable new tools for probing the hidden, or subliminal, workings of the mind. The result of this explosion of research is a new science of the unconscious, and a sea change in our understanding of how the mind affects the way we live. These cutting-edge discoveries have revealed that the way we experience life-our perception, behavior, memory, and social judgment - is largely driven by the mind's subliminal processes and not by the conscious ones, as we have long believed. Employing his trademark wit and his lucid, accessible explanations of the most obscure scientific subjects, Leonard Mlodinow takes us on a tour of this research, unraveling the complexities of the subliminal self, increasing our understanding of how the human mind works, and how we interact with friends, strangers, spouses and coworkers. In the process he changes our view of ourselves and the world around us.

Editorial Review

Amazon.com Review

Guest Reviewer: V.S. Ramachandran on *Subliminal*

V.S. Ramachandran is a neuroscientist known for his work in the fields of behavioral neurology and visual psychophysics. The author of The Tell-Tale Brain, He is the Director of the Center for Brain and Cognition, and is currently a Professor in the Department of Psychology and the Neurosciences Graduate Program at the University of California, San Diego.

This delightfully accessible yet intellectually rigorous book transcends traditional boundaries between neuroscience, psychology and philosophy, to tackle the riddle of the unconscious mind. Freud bashing is a popular intellectual pastime these days (I myself have been guilty on occasion) but Mlodinow shows that by emphasizing the unconscious he was on the right track: we are completely

unaware of the vast majority of events going on inside our brains. The book presents compelling evidence gleaned from a variety of sources to show that much of our behavior is governed not so much by our conscious mind – which is prone to claim credit – but by a cauldron of motives, drives and unconscious propensities of which we are largely oblivious. Indeed, most of our actions are carried out by the unconscious mind (or minds) which exists in peaceful harmony with the conscious person "inside" your body. The question of why we are conscious of the tip of the iceberg of neural activity continues to remain elusive but, perhaps, the answer can be found by asking what you can do without being conscious; What's the IQ of the unconscious mind? Here Mlodinow offers dazzling new insights into what the unconscious can and does do, to influence our lives.

Review

PRAISE FOR The Drunkard's Walk: Mlodinow writes in a breezy style, interspersing probabilistic mind-benders with portraits of theorists ... The result is a readable crash course in randomness New York Times If you're strong enough to have some of your favorite assumptions challenged, please read The Drunkard's Walk, a history, explanation, and exaltation of probability theory Fortune magazine Delightful...Our lives may be shaped by chance, but they are enriched by awareness-just the sort of awareness that this fascinating book will give you Guardian Leonard Mlodinow never fails to make science both accessible and entertaining -- Stephen Hawking, author of A Brief History of Time With the same deft touch he showed in The Drunkard's Walk, Mlodinow probes the subtle, automatic, and often unnoticed influences on our behavior -- Daniel J. Simons, Professor of Psychology, University of Illinois, and co-author of The Invisible Gorilla: How Our Intuitions Deceive Us If you liked The Drunkard's Walk, then you'll love Subliminal. Mlodinow has written an engaging and insightful book that explores the new science of the unconscious. In Subliminal, Mlodinow not only makes neuroscience understandable-he makes it fascinating. After reading this book, you will look at yourself (and those around you) in a new way -- Joseph T. Hallinan, author of Why We Make Mistakes Think you know the whys and hows of your choices? Think again. Follow Mlodinow on a

gorgeous journey into the enormous mental backstage behind the curtain of consciousness -- David Eagleman, Author of Incognito: The Secret Lives of the Brain

About the Author

LEONARD MLODINOW received his PhD in theoretical physics from the University of California, Berkeley, was an Alexander von Humboldt Fellow at the Max Planck Institute, and now teaches at the California Institute of Technology. His previous books include War of the Worldviews (with Deepak Chopra); the two national best sellers The Grand Design (with Stephen Hawking) and The Drunkard's Walk (a New York Times Notable Book and short-listed for the Royal Society Prize for Science Books); Feynman's Rainbow; and Euclid's Window. He also wrote for the television series MacGyver and Star Trek: The Next Generation.
